MEMORANDUM FOR: Assistant for Plans and Development, NPIC

ATTENTION: [REDACTED]

25X1A

SUBJECT: Chip Comparator Reticule

1. A number of photointerpreters from the Photographic Analysis Group have examined the 20 micron dot reticule that has been provided with the Chip Comparator recently received by the Imagery Analysis Division. The unanimous opinion expressed is that this reticule is unsatisfactory.

2. It is recommended that a crosshair-type reticule be provided for the Chip Comparator due for delivery in PAG.

3. Your action on this request as soon as possible would be appreciated.
